AD-301	Activity Report	Academic Year: 2026-27
Rev-00		Semester: V/VI

DEPARTMENT OF COMPUTER ENGINEERING

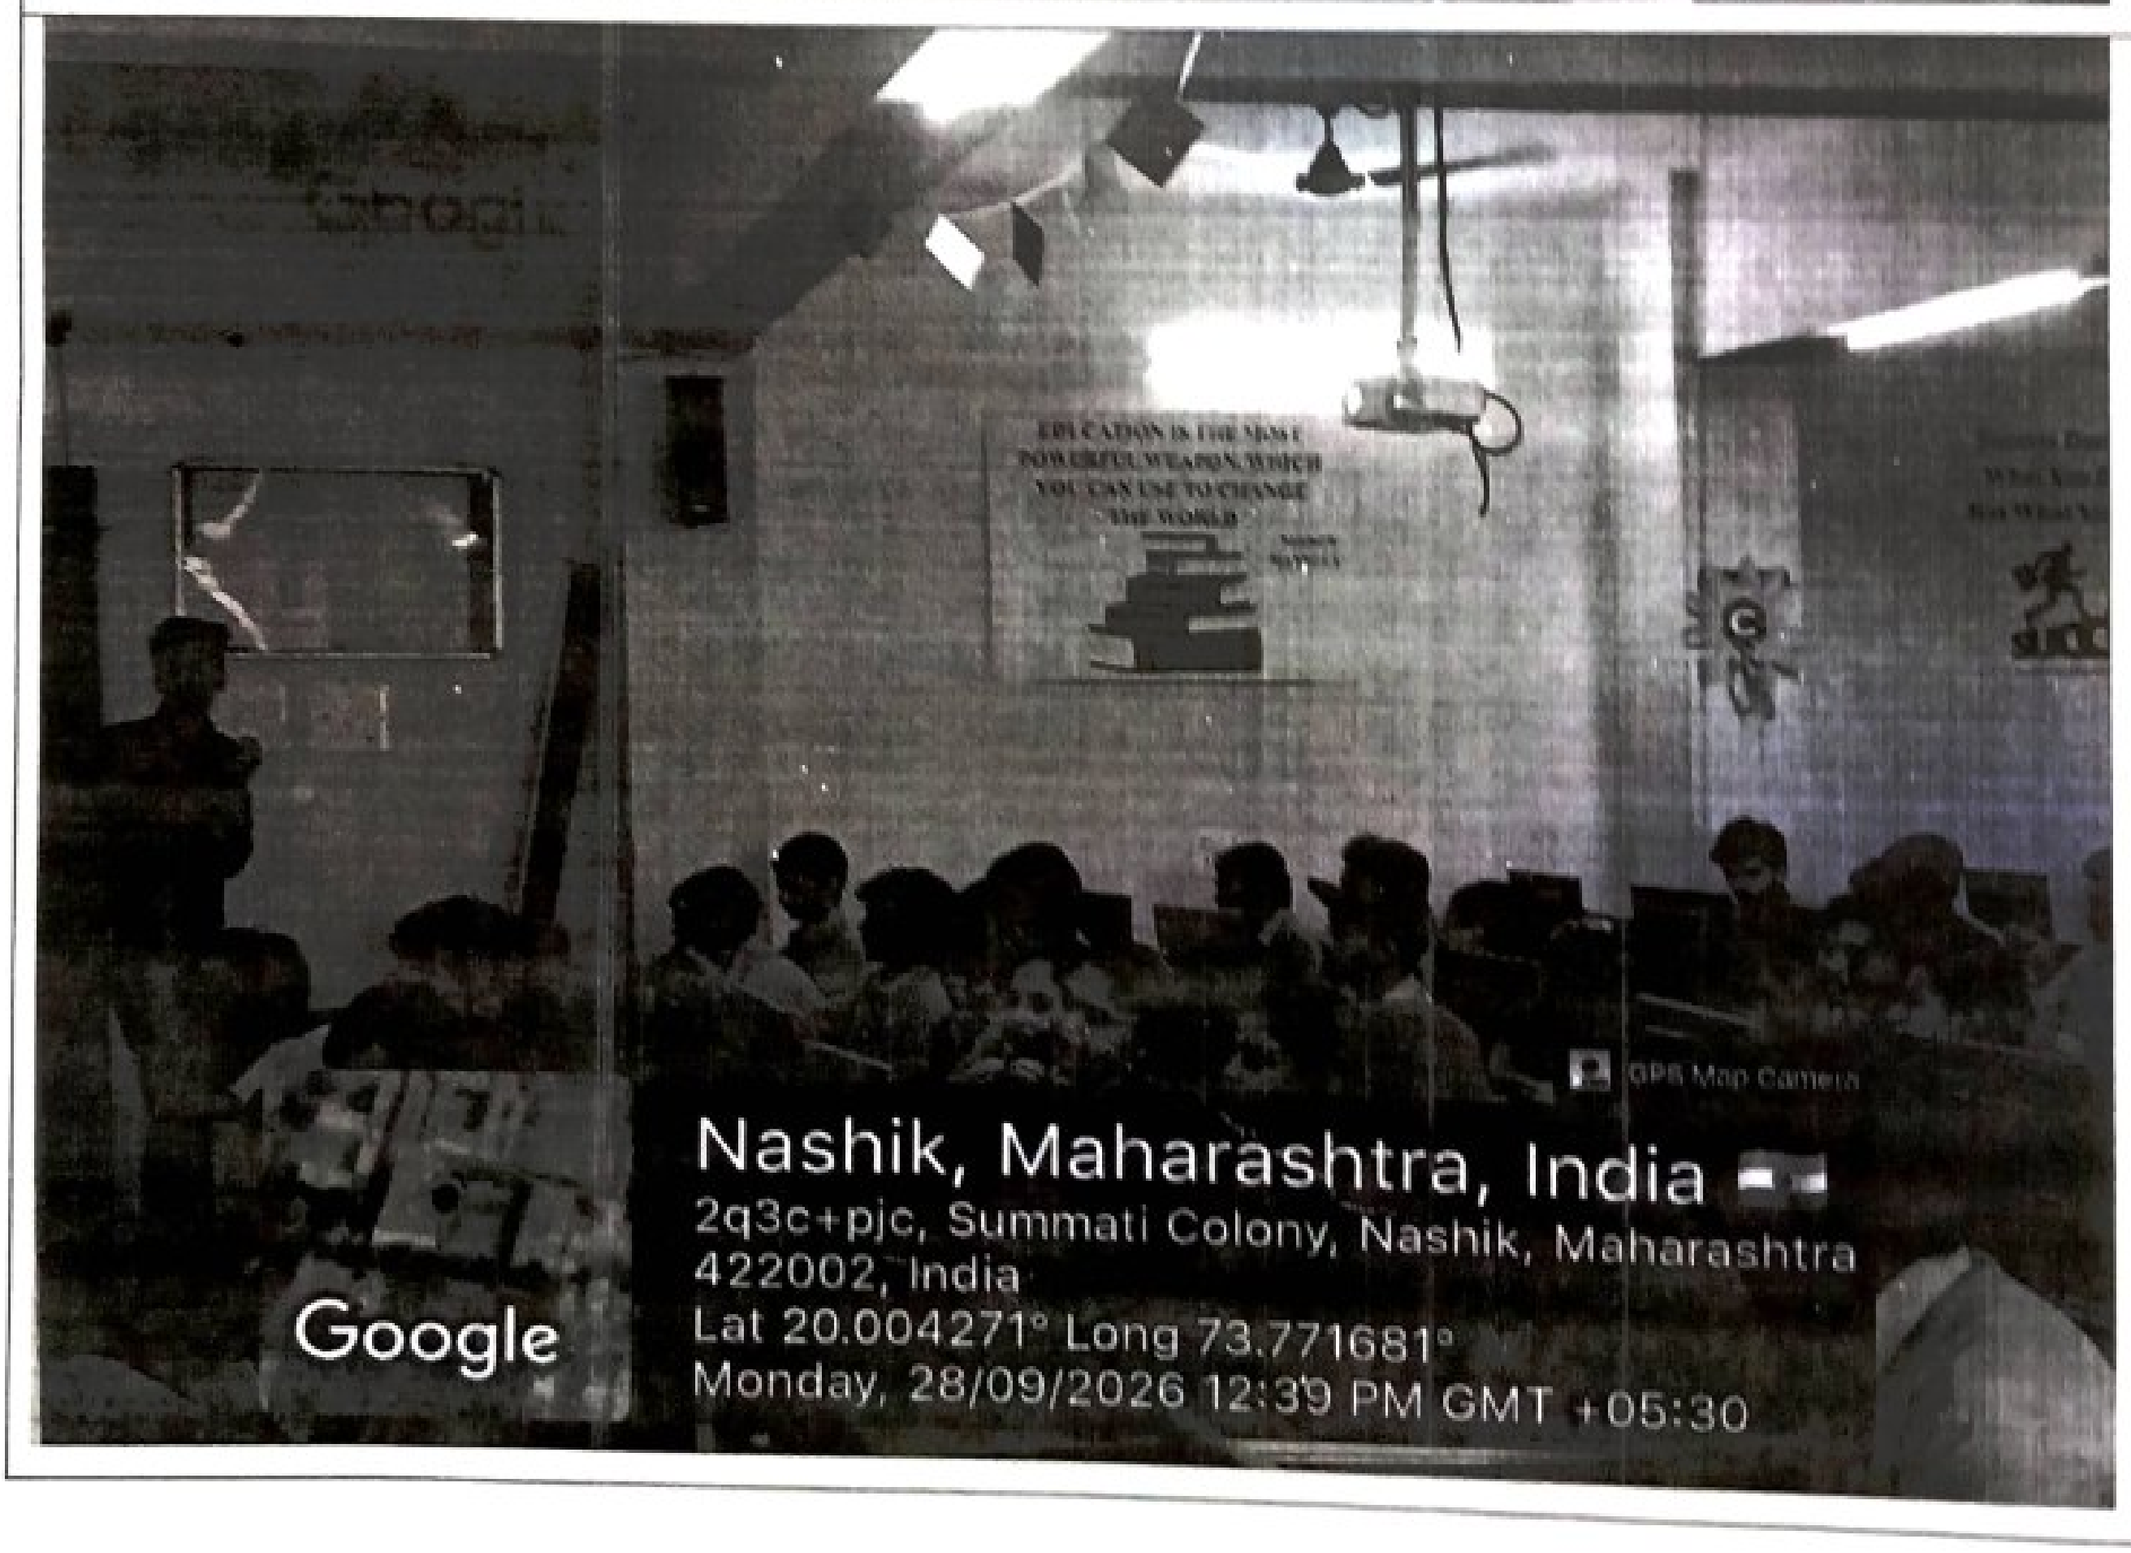

Particulars	Description
Activity	Workshop / Expert Session
Activity level	Department Level
Title	Expert Web Technology Bootcamp Workshop
Speaker / Resource Person	Mr. Tejas Bodke Next In Soft Pvt. Ltd.
Organized by	Department of Computer Engineering
Venue	Room No. 321, Department of Computer Engineering
Date & Time	28.09.2026 to 01.10.2026 10:00 AM to 4:00 PM
Objectives of the activity	The objective of the Web Technology Bootcamp Workshop was to provide students with practical knowledge and hands-on experience in modern web development technologies. The workshop aimed to strengthen students' understanding of HTML, CSS, JavaScript, responsive web design, and current web development practices. It also focused on improving students' technical skills and preparing them for academic projects and industry requirements.
Outcomes of activity	After completion of the workshop, students were able to understand the basic structure and development of web pages using HTML, apply CSS for effective webpage styling, use JavaScript for adding interactivity to websites, and understand the principles of responsive web design. Students also gained practical exposure to modern web development practices and improved their confidence in developing web-based applications.
Targeted participants	Third Year (TE) Computer Engineering Students
Total no. of participants, Participation %	80%
Content of the activity	The workshop covered the fundamentals and practical implementation of HTML, CSS, and JavaScript. Students were introduced to webpage structure, styling techniques, layouts, JavaScript-based interactivity, responsive web design, and modern web development practices. Hands-on exercises and demonstrations were conducted to help students understand how different web technologies are integrated while developing responsive and interactive websites.

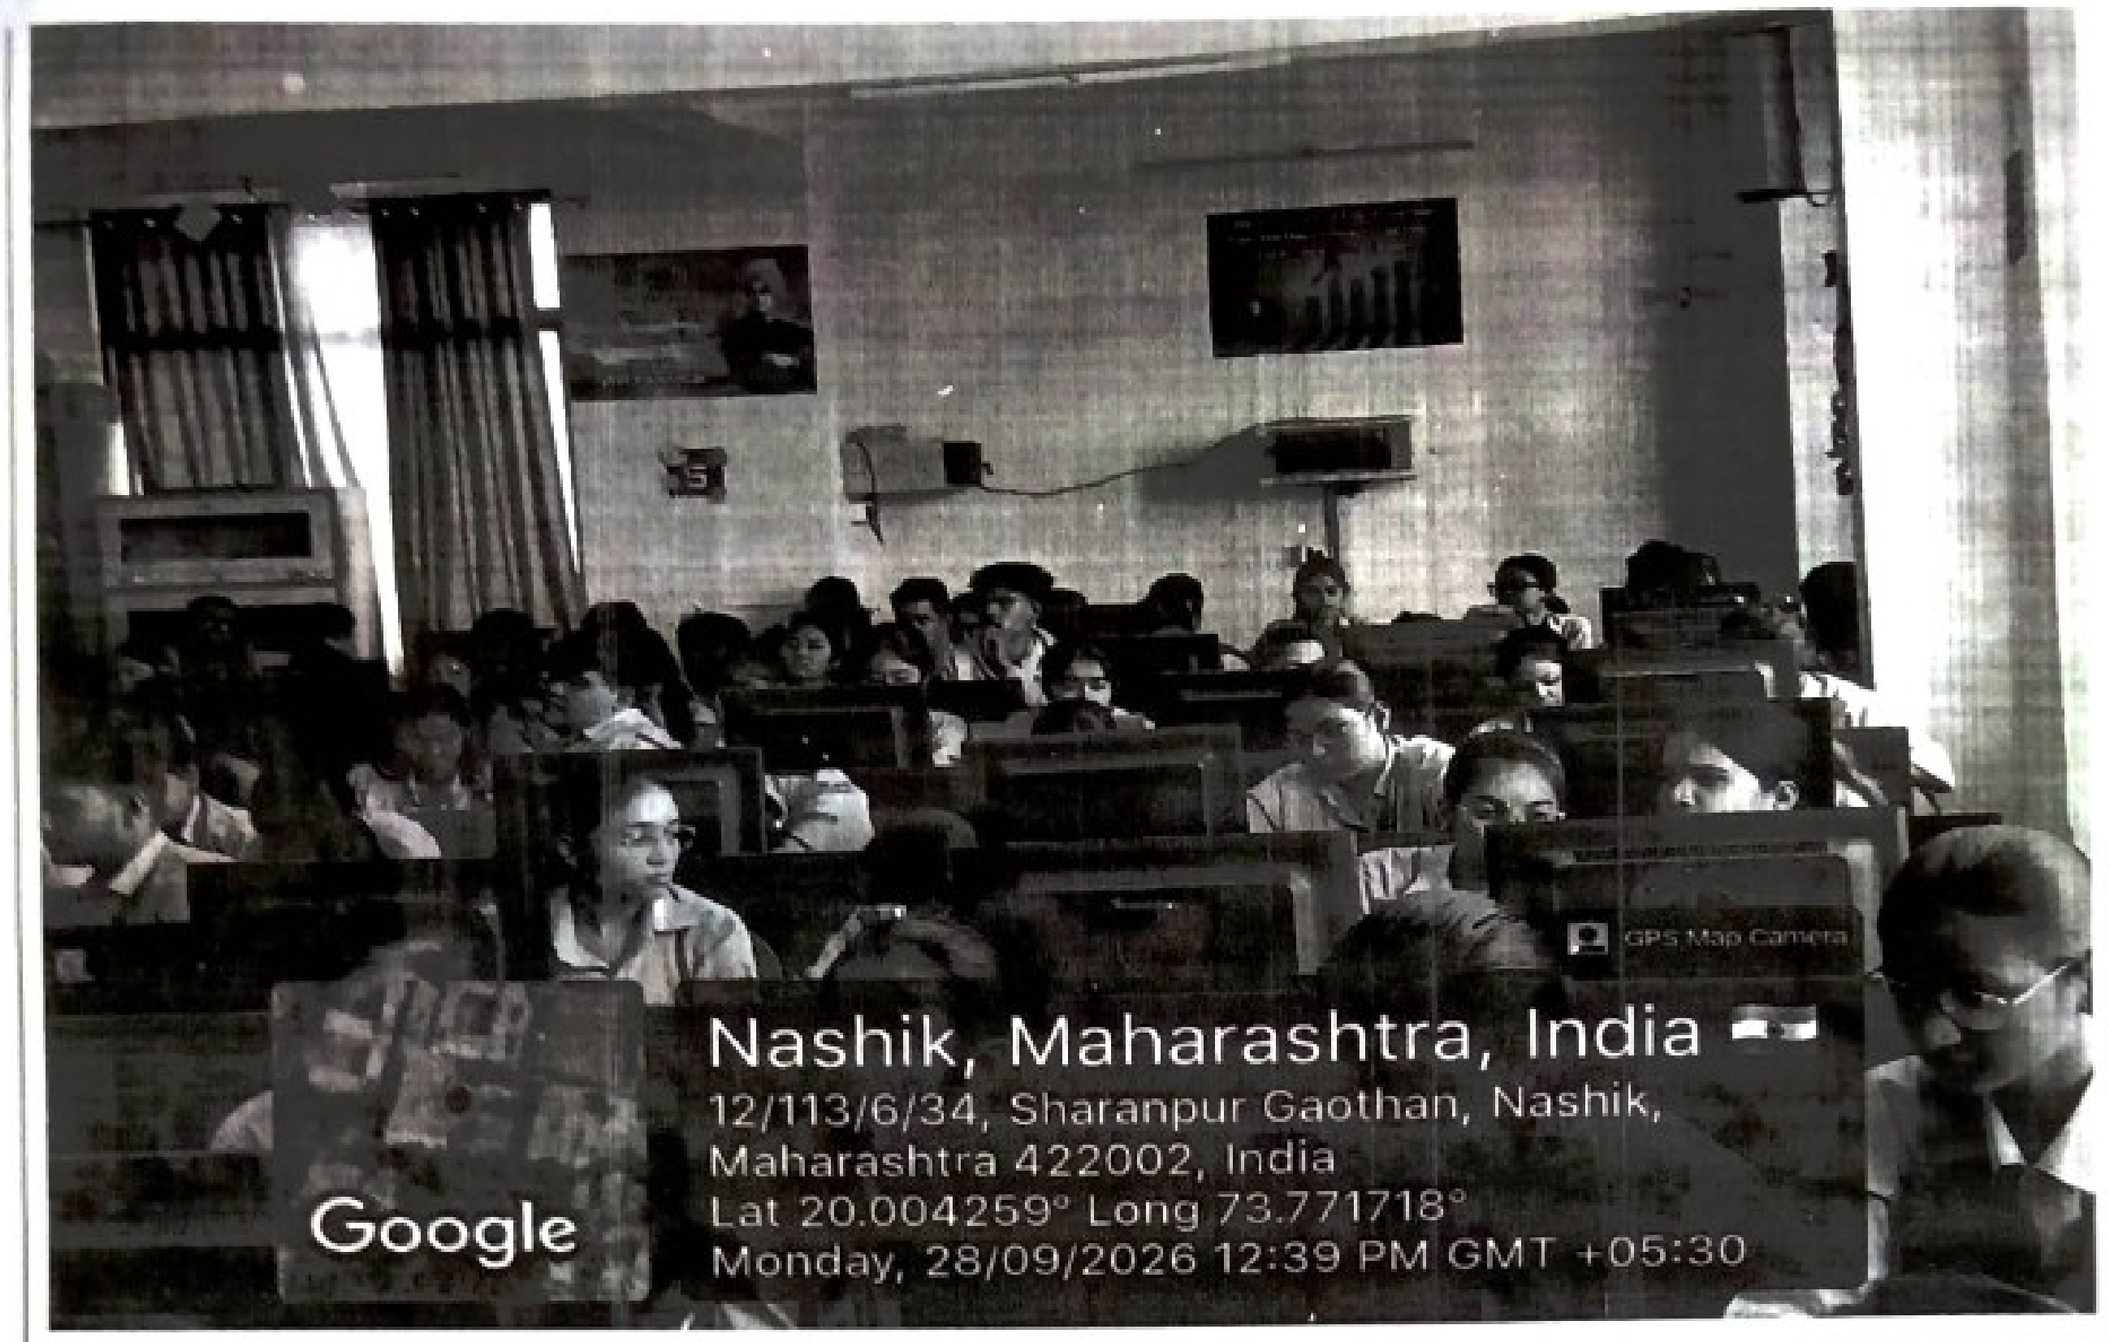

Relevance to POs	The workshop contributed to the development of engineering knowledge, problem-solving abilities, design and development skills, effective use of modern engineering and IT tools, individual and teamwork skills, and lifelong learning abilities among students.
Relevance to PSOs	The activity helped students apply programming and computing concepts for developing web-based solutions. It enhanced their ability to use modern software development tools and technologies for designing and implementing practical applications relevant to the field of Computer Engineering.
Methodology used	The workshop was conducted using interactive lectures, live demonstrations, hands-on practical sessions, coding exercises, and problem-solving activities. Students actively participated in developing webpages and implementing HTML, CSS, JavaScript, and responsive design concepts under the guidance of the resource person.
Brief Description of the Activity	The Department of Computer Engineering organized an **Expert Web Technology Bootcamp Workshop** from **28 September 2026 to 1 October 2026**, from **10:00 AM to 4:00 PM**, for Third Year Computer Engineering students. The workshop was conducted by **Mr. Tejas Bodke from Next In Soft Pvt. Ltd.** The workshop provided students with practical exposure to essential web development technologies such as **HTML, CSS, JavaScript, responsive web design, and modern web development practices**. The resource person explained the concepts through demonstrations and hands-on coding activities. Students actively participated in practical exercises and learned how to design, develop, and improve responsive and interactive websites. The workshop helped bridge the gap between theoretical knowledge and practical implementation while enhancing students' technical and industry-oriented skills.
